

Read! Spell! Do! Level 2 samples

Read! Spell! Do! 8 levels with 2,160 cards in total. Still relatively unknown but wildly popular among users. 540 verbs, 180 adjectives, 90 adverbs (2 different cards for each adverb), where else can you get such a game? There is also a playing board with a copy of the rules on it.

Level 2 uses all 16 double sounds introduced in NFO. Keywords in level 2-1 use ea, ee, sh, ch, ar, ou, oo (foot), oo (spoon) and -se. Level 2-2 uses ow (cow), ir, oy, or, oa, ow (window), ai, ay and tch. The sounds have been used evenly throughout, meaning the phonic element of the cards is very strong and that the teacher, who is cognisant of his students reading level, can choose and use the cards with confidence. The key sounds (spelling patterns), sentences, words and phrases are listed according to their double sound (grapheme of phonogram), so you can better see the content and suitability.

90 cards to each pack at 1,500 yen per pack.

6 packs available in Levels 2-1 and 2-2:

Read! Spell! Do! Rules

How to play the game

You will need dice, counters, paper and pencils as well as a set of cards. For mixed level classes use two levels of cards, especially for the Read! cards

Place the cards face down on the board. Players take turns to throw a die and move the (rearmost) counter forward by the number shown.

If you land on a yellow square, pick up a 'spell' card and read the word saying "Please spell...", then the other player/s write the word. Jan-ken for the card if need be, keep card if all incorrect.

If you land on a blue square, pick up a 'read' card, read the word and sentence and keep the card.

If you land on a pink square, pick up a 'do' card and other players ask "What are you doing?" Answer "I'm ...ing ..." whilst doing the appropriate action, then keep the card or the player on your right picks up the card and asks "Can you ...?" answer "Yes, I can." and do the action, then you keep the card, answer "No, I can't.", the another student can try for a bonus card.

If you land on an orange square, then do all three.

If you land on a fishing square, then throw the dice and move back the number shown and do the activity.

If you land on the dice square, then throw again to move forward and do the activity.

The game ends when all counters reach the finish or you run out of cards; cards can now be counted if you wish.

Up to six players can play in pairs or group/s on one board. All six players can be involved at the same time. To speed up the game use fewer counters and more dice.

Generally you will use about 15 cards for each counter to go around the board.

Feel free to play around with the rules of the game.
